

FREDERICK OPPONG TABIRI

Digital Product Manager

Stirling, Scotland | 07925 766070 | t02ft22@gmail.com | linkedin.com/in/frederick-tabiri

PROFESSIONAL PROFILE

Digital Product Manager and founder of TabSphere LTD. I have shipped and led the delivery of multiple digital products across SaaS, customer engagement and logistics. I work at the product and technical interface: defining user problems, requirements, journeys, priorities and acceptance criteria; directing UX/UI; coordinating developers and AI-assisted delivery tools; and validating releases through QA and UAT. My MSc Information Technology, CompTIA Security+ and graphic design background help me connect product strategy, user experience, technical constraints and business delivery. Developers carry out production implementation.

CORE CAPABILITIES

Product strategy and discovery • Requirements and user stories • Backlog prioritisation • Acceptance criteria • SaaS delivery • Stakeholder coordination • UX/UI and service design • User journeys and prototyping • Customer onboarding • Admin and access workflows • QA and UAT • Release validation • Product analytics • Security-aware delivery

PROFESSIONAL EXPERIENCE

Founder and Digital Product Manager | TabSphere LTD

Jun 2025 - Present | Scotland, UK

- Set product direction across several digital products, defining problems, scope, workflows, priorities, user stories and acceptance criteria.
- Translate customer and business needs into structured work for developers and AI-assisted tools; review designs and implementation against usability, business and technical expectations.
- Coordinate delivery across onboarding, authentication, admin workflows, permissions, payments, transactional email, analytics, technical SEO and security-aware controls.
- Run QA and UAT across roles, responsive layouts, critical journeys and edge cases; validate pre-production and live releases and direct iteration.

SELECTED PRODUCT DELIVERY

- SteadyBrief: interview preparation SaaS (steadybrief.co.uk). Led product definition, CV and vacancy journeys, onboarding, entitlements, admin requirements, UX direction, UAT and release readiness.
- Tappivo: NFC and QR customer engagement (tappivo.com). Shaped business onboarding, owner and super-admin workspaces, touchpoint destinations, ordering and provisioning concepts, analytics and acceptance testing.
- ShipOpz: freight operations platform (shipopz.com). Contributed strategy, rebrand and UX direction for booking, customer and operations journeys; developed requirements and walkthroughs and tested the user workspace.
- TabSphere digital platform (tabsphere.co.uk). Directed the website rebuild, responsive experience, portfolio and CMS/admin workflows, contact journeys, accessibility, SEO and release testing.

Lead Graphic and UX Designer and Media | Forestry Commission Ghana, Wildlife Division

Sep 2017 - Aug 2022 | Accra, Ghana

- Led visual communication, UX and digital media for public-facing conservation work across 23 protected areas; produced interface concepts, digital and print campaigns and stakeholder materials.
- Coordinated creative contributors and helped grow the media function from approximately eight to around 30 people.

Graphic Designer | Ahead Media Ghana

Jun 2016 - Sep 2017 | Ghana

- Translated client and business briefs into branding, digital campaigns, print design and customer-facing visual communication.

Security Officer | GuardWatch / ABP Bridge of Allan and SecuriGroup

Nov 2024 - Mar 2026 | Scotland, UK

- Worked across access control, site security, incident awareness and reporting, client communication and procedure adherence.

ADDITIONAL PRODUCT AND VENTURE WORK

- CommutAble: accessibility-focused mobility venture in development; proposition, disabled-user journeys, stakeholder needs and journey-scoring concept.
- Ava World: early-learning product in development; parent and child journeys, requirements and testing.
- ODDSO AI: Ghana sports-analysis concept; UX direction, subscription and Mobile Money planning.
- TS-SOC: internal security operations tool; workflow scope, role/access considerations and release testing.
